PREPARATION OF THIS DOCUMENT

This list of selected reference books and monographs was prepared to help students, researchers, field workers and laymen locate and retrieve published information on freshwater aquaculture. Most of the books selected are less than twelve years old and are still available either from their publisher or from technical bookstores. Although the majority of them are in English, the list also includes major French, German, Italian and Spanish titles currently available on the subject.

The titles are listed in chronological order of year of publication. For each particular year, they are listed in alphabetical order of authors' names. Author, taxonomic, geographic and subject indexes provide further assistance in retrieving the information required.

The present circular completes the information on aquaculture literature provided in similar lists published in the same series as follows:

(i) **Aquaculture in marine waters.** A list of selected reference books and monographs, 1961-1991. FAO Fish.Circ., (723)Rev.4: 57 p. 1991

(ii) **A list of selected FAO publications related to aquaculture, 1966-1989.** FAO Fish.Circ., (744)Rev.2:60 p. 1990

(iii) **Selected aquaculture publications: serials, newsletters, meeting proceedings and bibliographies/directories/glossaries.** FAO Fish. Circ., (808) Rev.I : 133 p. 1991

It is planned that subsequent revisions will make it possible to keep these lists current. Suggestions from users of modifications which should be introduced would be welcome. They may be addressed to the Senior Fishery Resources Officer (Aquaculture), at the Inland Water Resources and Aquaculture Service (FIRI), FAO, I-00100 Rome (Italy).
